DETAILED ACTION

Allowable Subject Matter

1. Claims 1-21, 23-42, and 44-50 are allowed.
2. The following is an examiner's statement of reasons for allowance: Claims 1-13 are allowed because the closest prior art of record fails to disclose a method wherein at least a part of the plurality of cells of the frequency divider are synchronously reset in response to a reset signal *by returning each cell into a predetermined respective state in combination with the rest of the limitations of the base claims and any intervening claims*. Claims 14-21 are allowed because the closest prior art of record fails to disclose a circuit wherein the reset signal is provided by a control circuit in combination with the rest of the limitations of the base claims and any intervening claims. Claims 23-24 and 44-46 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 12 wherein the circuit operates as called for in the claims in combination with the rest of the limitations of the base claims and any intervening claims. Claims 25-31 and 47-50 are allowed because the closest prior art of record fails to disclose a circuit as shown in Figure 8 wherein the reload signal (RI) is provided by the second output node of the last cell of the fourth/tenth type (Fout) in combination with the rest of the limitations of the base claims and any intervening claims. Claims 32-42 would be allowable because the closest prior art of record fails to disclose a circuit as shown in Figure 12 wherein the divider has a reset node (Rs) and a reload node (RI) in combination with the rest of the limitations of the base claims and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
